

Procon Engineering Ltd

Procon *ForceCal* Silo and Vessel Calibration System

Procon Engineering's highly successful *ForceCal* Force Calibration System for calibrating weighing vessels, silos and hoppers is now available with a system capability of up to 50 tonne.

This well proven method provides a high accuracy, non intrusive and expedient method of calibrating weighing systems with full traceability to UKAS standards.

- Silos are calibrated to UKAS standards
- Calibration can be carried out 'without emptying system'
- Calibration can be carried out in 'minutes'
- Battery powered ATEX certified 'IS Zone One' test equipment
- UKAS certification issued on-site
- Work carried out by Procon's experienced Field Service Team

Calibration without compromise.....

- Calibrations carried out during normal production cycle
- Net Calibration range from 0 to 50 te
- No vessel modifications required
- Over 2000 vessels in the UK are currently being calibrated using **ForceCal**

**For a Free Site Survey or Demonstration call our 24/7 Service hot line on:
01732 781319
or email: rod.massey@proconeng.com
Further information is available at our dedicated web site: www.forcecal.com**

Service and Support

Procon Engineering places great emphasis on after-sales service and support. We operate a comprehensive service, support, installation and commissioning facility throughout the **UK and the Rest of the World – 24 hours a day, 7 days per week**. We understand that your equipment and installations have their own specific requirements and our tailored contract maintenance schemes ensure your plant performance is maintained at peak potential.

Procon Engineering is an ISO9001:2000 accredited company, and has Quality and Health and Safety approvals from institutions such as Lloyds Register, National Weights and Measures Laboratory, National Britannia, together with industry relevant Passport Schemes.
